Instructions to speakers:

1. Please prepare your presentation to introduce a research topic, novel finding or a technique in developmental biology to audiences from different groups.
2. Remember to give good introduction to the topic, especially if your presentation is primarily based on a single article.
3. Connect the presentation to your own work. Show your own data whenever possible.
4. Good length of the presentation is 45 min + 15 min discussion.
5. Seminar room is equipped with computer and video projector. Bringing your own computer is an option.
6. Remember to send a notice of your seminar on Tuesday to the address: devbiol-network@helsinki.fi. **Cancellation is not allowed in principle.**
