

Seminars in Genetics

New series of genetics seminars will be held on selected Fridays at 9:15 am
Everyone is welcome to come!!!!!!

7.03	<u>Vassileios Stratoulas</u> Microglia-like cells in the Drosophila brain: identification, generation and conserved pathways.	BK3 6201
14.03	<u>Zuzanna Misiewicz</u> TBA	BK3 6406
21.03	<u>Mariann Kasel</u> Functional analysis of mismatch repair gene variants of uncertain significance and their possible contribution to Lynch syndrome.	BK3 6201
28.03	<u>Kiran Hasygar</u> Ribosome surveillance pathway regulates Drosophila insulin like peptide secretion.	BK3 6201
4.04	<u>Rich Melvin</u> Natural variation in tolerance of dietary sugar.	BK3 6201
25.04	<u>Pashupati Mishra</u> Gene set analysis based on Gene Set Z-score and asymptotic p-values.	BK3 6602
9.05	<u>Juho Väänänen</u> Potential anxiety-related genes in 6 different mouse strains.	BK2 3014
16.05	<u>Judit Garcia Gonzalez</u> TBA	BK3 6406
23.05	<u>Laura Lahti</u> TBA	BK2 3014
6.06	<u>Maarja Haugas</u> TBA	BK2 3014

10 attendance = 1 ECTS, own presentation = 1 ECTS
Seminar code: 529063
