• ABA signalling in stomatal guard cells
• CAM and system dynamics modelling
• Regulation of columnar growth habit in apple

• Tansley reviews
  Carbon isotope discrimination in terrestrial plants
  Evolution of plant mitochondrial genomes
CONTENTS

Forum
939 Introduction to a Virtual Special Issue: modeling the hidden half – the root of our problem
943 Flow-limiting valve for ABA signalling in stomatal guard cells
946 Informing the improvement and biodesign of crassulacean acid metabolism via system dynamics modelling

Review
950 Environmental and physiological determinants of carbon isotope discrimination in terrestrial plants
966 Paternal leakage, heteroplasmy, and the evolution of plant mitochondrial genomes
D. E. McCauley

Research reviews
978 One ring to rule them all? Genome sequencing provides new insights into the ‘master circle’ model of plant mitochondrial DNA structure
D. B. Sloan
986 Evolutionary responses of native plant species to invasive plants: a review
A. M. O. Odor

Research
993 Evidence for regulation of columnar habit in apple by a putative 2OG-Fe(II) oxygenase
P. J. Wolters, H. J. Schouten, R. Velasco, A. Si-Ammour & P. Baldi

Cover Legend
Aims and Scope

New Phytologist offers rapid publication of high quality, original research in plant science. Falling within four sections – Physiology & Development, Environment, Interaction and Evolution – articles cover topics that range from intracellular processes through to global environmental change. Cross-disciplinary approaches are particularly encouraged but for guidance the journal is organized as follows and recognizes that techniques from molecular and cell biology, and functional genomics through to modelling and system-based approaches will be applied across the whole spectrum of plant science:

- **Physiology & Development**: intra/inter-cellular signalling, long-distance signalling, physiology, development, eco-devo – phenotypic plasticity, transport, biochemistry.
- **Environment**: global change and Earth system functioning, environmental stress, ecophysiology, plant–soil interactions, heavy metals.
- **Interaction**: multitrophic systems, mycorrhizas and pathogens, fungal genomics, nitrogen-fixing symbioses.
- **Evolution**: molecular evolution, population genetics, mating systems, phylogenetics, speciation, plant–enemy coevolution.

All papers must focus on timely research that provides new insights into the broad principles of plant science. The topic should be original, addressing clear hypotheses or questions and of general interest to our readers. In addition to original research articles, short Letters and other submissions to the Forum section, as well as Research reviews, Rapid reports and both Modelling/Theory and Methods papers, are also encouraged. Please refer to the full Author Guidelines for further information (www.newphytologist.com).

About New Phytologist

- **New Phytologist** is owned by the New Phytologist Trust, a not-for-profit organization dedicated to the promotion of plant science, facilitating projects from symposia to open access for our Tansley reviews.
- We are committed to rapid processing, from online submission through to publication ‘as ready’ via Early View – our average time to decision is <25 days.
- There are no page or colour charges and a PDF version will be provided for each article. Authors may opt to make their article ‘open access’ by subscribing to the Wiley Blackwell Online Open service.
- The journal is available online at Wiley Online Library. Visit www.newphytologist.com to search the articles and register for table of contents email alerts.
- If you have any questions, do get in touch with Central Office (np-centraloffice@lancaster.ac.uk) or, if it is more convenient, our USA Office (np-usaoffice@ornl.gov).
- For submission instructions, subscription and all the latest information visit www.newphytologist.com.

Information for subscribers

New Phytologist is an electronic (online-only) journal published as 16 issues per year. Four parts form a volume and four volumes are published annually. Institutional subscription prices for 2013 are US$3396 (Americas), €2335 (Europe), £1839 (UK), US$3962 (Rest of World). Prices are exclusive of tax and include access to the current and all online back files, where available.

For other pricing options and further information visit www.newphytologist.com/subscribe
